NOTES

^{*} The three-month moving averages shown in this exhibit are computed by summing the subject month and the two prior months, dividing by three, and showing the average at the end month of the period. A moving average is useful in smoothing the volatile trade data so that trends can better be discerned.

^{*} For information on data sources and methodology, see the information section on page A-1 of this release or at www.census.gov/ft900 or at www.bea.gov/newsreleases/international/trade/tradnewsrelease.htm.
